At the heart of the Regional Natural Park of the Catalan Pyrenees

In the extreme south of the Languedoc - Roussillon, the Regional Natural Park of the Catalans Pyrenees forms the border with Spain and Andorra on the line of pyreneans summits, in the heart of the Catalan cultural area . Mountain territory extends over 137,000 hectares, the Catalan Pyrenees offer a unique ecological diversity from 300 up to 3000 meters. Lined with majestic mountains as the Carlit, the Puigmal or the mythical mountain of the Canigou, the Natural Park has a particular mountain climate , but it is also subject to Mediterranean influences . The Catalans Pyrenees are also a territory inhabited by over 23,000 people spread over 64 villages and towns. If the three small areas that make up the Park - Capcir , Cerdanya and Conflent - welcome all people despite its altitude, is that they have a lot of altitude valleys. This variety of climates and reliefs are found themselves in the earth, the cultural heritage and the activities availables within the Park. from Climbing to skiing, from fruit juices to cheeses , from the fortifications of Vauban to the Yellow Train through the solars furnaces, Catalan Pyrenees combines natural pleasures : cultural , gastronomic , scientific and many other interesting things...
